For Auditor, JACOB WALEY, Esq., M.A.

HENRY WARBURTON, *Chairman.*

On the motion of Mr. R. Taylor,

RESOLVED,—That the thanks of the College be given to Mr. Warburton for his kindness in presiding at this Meeting, and for his conduct in the Chair.

REPORT.

STUDENTS.

THE number of Students and Pupils in the Session 1846–47 was 888, an increase of 76 on the number of the preceding year. In the Faculty of Arts and Laws there were 231 Students, including 41 attendants on the Classes for Schoolmasters. There were besides, 14 attendants on the Birkbeck Summer Course of Practical Chemistry, given for the first time last Session, in pursuance of the arrangement with the Committee of Subscribers to the Birkbeck Testimonial. The Students in the Faculty of Medicine were 303. There were 354 Pupils in the Junior School; the highest number in one term was 291. The aggregate of fees was 15,130*l.* 1*s.* Of that sum, 7173*l.* 14*s.* was received for the Faculty of Medicine, 3868*l.* 17*s.* for the Faculty of Arts and Laws, and 4087*l.* 10*s.* for the Junior School. To the Professors and Masters the sum of 9198*l.* 11*s.* 7*d.* was paid as their portion of the fees, and 300*l.* as augmentations to the receipts of the Professors of Natural Philosophy and Astronomy, and of Anatomy and Physiology. There remained as the College portion, 3302*l.* 11*s.* 5*d.* The fees received of Students and Pupils for instruction in the Hospital, amounting to 2628*l.* 18*s.*, were transferred to the Hospital Committee for the support of the Charity.

For the current Session, the entries to the present time are as follows:—To the Classes of the Medical Faculty, 284 Students, being a slight increase to the numbers at the corresponding period of last Session: the new entries are 92, exceeding those of last year at the same time by 23. There are 92 new entries to Hospital Practice. To the Classes of the Faculty of Arts and Laws the total number of Students entered to this day is 199; this is less by 25 than at the corresponding period of last year. The new Students are 107, 5 more than last Session; 41 are attending the Schoolmasters' Classes. Notwithstanding the diminution in the total number of Students in the Faculty of Arts, the sum received for their Class Fees to this time is greater than that received at the same date last year, from which it may be inferred that the decrease is in occasional not in general Students. The Class of Mathematics has continued increasing, and now numbers 117. The Class of Greek has risen from 70 to 80. The Students attending the Professor of Natural Philosophy would exceed those of last year but for the absence this Session of a certain class of Students (13) who attend in alternate years. The Professor of Architecture has 29 Students in his Class. The Class of Analytical Chemistry contains 18 Students.

DEGREES AND HONOURS.

The Graduates at the London University from the College were as follows:—M.D. 4, of a total of 9 from 5 schools; M.A. 2, of a total of 3; LL.B. 1, from a total of 2; B.M. 5, of a total of 19 from 5 schools; B.A. 16, of a total of 36 from 10 schools, being in all, out of 69 Graduates from 15 schools, 28 from this College. Of Undergraduates, 7 Students from this College passed the First Examination for B.M. out of a total of 22 from 8 schools; and 40 the Matriculation Examination out of a total of 151 from 34 schools.

The University Prizes obtained by Students of this College were as follows,—The Medical Scholarship in Physiology and Comparative Anatomy by Mr. Henry Wiglesworth, to whom was also awarded the Gold Medal in Midwifery: the Mathematical Scholarship for the B.A. Degree by Mr. Robert Baldwin Hayward: the Matriculation Exhibition in Mathematics by Mr. John Edward Routh: the Gold Medal at the M.A. Degree by Mr. Isaac Todhunter: and a Gold Medal in Anatomy and Physiology at the First Examination for the Degree of B.M. by Mr. James Morris: Book Prizes in Chemistry and Zoology by Mr. Richard Neale. Among the names above enumerated, the Council regard with peculiar interest that of Mr. Isaac Todhunter, who after proceeding to the Degree of A.M. of the University of London, and obtaining all the honours which the Senate confers in respect to the Mathematical Examinations, has since acquired the distinction of Senior Wrangler and First Smith's Prizeman at the University of Cambridge. The

Council notice these circumstances for the sake of the inference to which they lead, that the establishment of the Schoolmasters' Classes on the Patriot foundation of this College has had the desired effect; since it was as an attendant on those classes that Mr. Todhunter commenced his University career, and thus obtained the Certificate of Studentship, which entitled him to Examination at the University of London.

A Flaherty Scholarship in Classics of this College has lately been awarded to Mr. John Hutton Tayler. In 1847, the Annual Prize for General Proficiency in Medicine, to which the Council have attached the name of Longridge to commemorate the bequest in the year 1840 of 1000*l.* by the late George Henry Longridge, Esq. of Gateshead, was awarded to Mr. Thomas Park. The Council have learnt with great regret that Mr. Henry Gladdish Rosher, who obtained the Flaherty Scholarship in Classics in 1847, died at the early age of 21, shortly before the second year's payment became due.

Of the four Hindoo Students who accompanied Dr. Goodeve to England in 1845, the youngest, Soorjo Coomar Chuckerbutty, is the only one now remaining here. Dwarkanauth Bose, who went back to India last year, and Chunder Seal and Bholanoth Bose, who have lately set out on their return with Dr. Goodeve, have obtained the Diploma of the Royal College of Surgeons of England. The two last also took Degrees in Medicine at the University of London. Chunder Seal did not proceed beyond that of Bachelor. He attained a respectable position in the list of those who graduated with Honours. He also discharged the offices of Clinical Clerk, Dresser, and Physicians' Assistant at the Hospital. Bholanoth Bose was admitted to the Degree of M.D. He was more particularly distinguished by his attainments in the science of Chemistry.

The Council have recently had the satisfaction of observing that Mr. Stocks, who on the recommendation of the Faculty of Medicine of the College was nominated to the Assistant-Surgeoncy in the East India Company's Service placed at the disposal of the Council by Mr. Martin Tucker Smith in 1844, is distinguishing himself as a botanist, by making known the useful properties of the vegetable products of Scinde, the country where he is stationed, and by advancing our knowledge respecting the geographical distribution of plants.

Three former Students of the College, who had graduated with Honours at the University of London, were admitted Fellows of the College during the last Session: they were John Charles Bucknill, B.M., Bunnell Lewis, B.A., and Richard Holt Hutton, B.A.

THE JUNIOR SCHOOL.

There are now 263 boys in the Junior School; at the corresponding period of last year there were 282; and of the previous year 248.

The anxiety of the Council to render the teaching in the Junior School efficient has not abated. Among the means for attaining this end, a subdivision of the larger classes is one of the most obvious: and to effect this improvement, the Council have, in concurrence with the Head Master, determined to increase the number of Assistant-Masters, and to apply to the payment of such officers a larger portion of the School receipts than heretofore. To carry this reform into full effect, increased funds will be requisite, as well for paying the additional salaries, as for providing the requisites incidental to the instruction of a greater number of classes. The College will partly from its own resources meet the charge of the increased establishment: some share of it, however, must be borne by the parents and guardians of the boys. It is therefore proposed that, after the present Session, an addition of 1*l.* per term shall be made to the School-fee; so that, from the commencement of the Session in September next, the annual payment will be 18*l.* instead of 15*l.*

The sole grounds for raising the School-fees, being to obtain means for rendering the teaching more efficient, the Council will more than ever feel it incumbent upon them to exercise a system of vigilant superintendence and control over that branch of the Institution, and to see rules carried into effect for ensuring regularity and punctuality in every department. In making the arrangements for acting upon these views, they have received the hearty co-operation of the Head Master.

Mr. Hayward and Mr. Routh, the University Scholars already mentioned, had received their elementary education in the Junior School of the College. Mr. Routh also obtained at the end of last Session the First Prize in the Higher Division of the Senior Class of Mathematics of the College. Other Pupils from the School who last year distinguished themselves in the College Classes, were Mr. Frank Gutherie, who obtained the Third Certificate in the Higher Division of Senior Mathematics, and the Third Prize in the Junior Mathematical Class of Natural Philosophy; Mr. John Edward Wilkins, who gained the Second Prize in the Junior Class of Greek; and Mr. Charles Crouch, who obtained the Third Prize in the Junior Class of Latin.

+ others.

Holloway School Fund.

The Council, in concurrence with the wishes of the late Mr. Holloway, have adopted the following regulations for the application of the annual proceeds, amounting now to 66*l.*, of his bequest to the College:—"That in order to extend the benefits of the gift as widely as possible, the dividends be appropriated for paying the School Fees of such boys in the School as are distinguished for their merit, and as need pecuniary assistance for their education. Such assistance to be granted for three Terms, and renewable at the pleasure of the Council for the like or a less number of Terms, as often as the Council may think advisable, in reference to the state of education of the Pupil, and the circumstances of his parents or friends." It was gratifying to the Council to have an immediate opportunity of conferring the benefit of this endowment on an object of public sympathy, the orphan son of an esteemed poet.

LEGACIES AND DONATIONS.

Mr. Holloway's Legacy.

The Legacy of 2000*l.* by Mr. Holloway, mentioned in the Report of last year, was paid to the Council by the Executors, Mr. Spozzi and Mr. White, in the month of April. Invested in the public funds, it produced the sum of 2295*l.* 11*s.* Consols.

The Rev. Dr. Fellowes' Legacies.

Soon after the death of Dr. Fellowes, the Council received notice that he had bequeathed to them the sum of 500*l.* Consols, for the purpose of establishing with the interest an annual prize for such subject or purpose as the Council might judge best for the scientific benefit of the Institution; and to the Hospital 300*l.*, "to be added to the Fund for the permanent endowment of that excellent Institution."

The Council have since been informed by the Solicitors of Dr. Fellowes' Executrix, that his intentions in regard to the College will not be carried into effect, since as the sum of 500*l.* Consols was to be the produce of the sale of Real Estate, the Bequest was void under the Statute of Mortmain. The Legacy to the Hospital will be paid.

Dr. Holme's Residuary Bequest.

The late Dr. Holme of Manchester, who died in the month of November last, bequeathed the residue of his Personal Estate to the College, the income to be applied for the purposes of the Medical Department of the College, as the Council shall direct. The amount of this Bequest has not yet been precisely ascertained, but the Council have the authority of the Executors for expecting that it will not be less than 20,000*l.*, exclusive of an extensive Library abounding in valuable works of Literature, Medical Science, and Art.

Dr. Holme had practised as a physician in Manchester for more than half a century, and during a portion of that time was considered as the head of the Medical Profession in the town. He had attained the advanced age of eighty years. He was more especially distinguished as a man of general acquirements in literature and science. His acquaintance with ancient and modern British and Foreign literature was extensive; and he was conversant with all the most important scientific discoveries of his day. He was an intimate associate with the men of Manchester and the neighbourhood most eminent for their learning and science, among whom may be mentioned Dr. Dalton and Dr. William Henry. A biographer, in an article in the 'Manchester Guardian,' says, "It was his mission to foster and

stimulate a young society of ardent inquirers to the pursuit of knowledge, to the investigation of science, and the search after truth at a time when those pursuits were by no means fashionable, and when the ordinary enjoyments of leisure were of a debasing kind. Diffusing among the circles in which he mingled a love of literature and science which could not fail to strengthen and improve the mind, and to create a more elevated moral tone and condition of our local society, he contributed in no small degree to advance the tastes of the more influential ranks in the town, and through them, by emulation to awaken that love of literary and scientific pursuits by which many in the ranks below them have of late years been distinguished." Of the high estimation which Dr. Holme's character in these respects had obtained for him, sufficient proof is afforded by his election to succeed Dr. Dalton as President of the Literary and Philosophical Society at Manchester, his being President of two other Societies, the Manchester Natural History Society, and the Chetham Society: while the respect in which he was held by his brethren of the Faculty, of all classes, is attested by the fact that he was the first President of the Medical Section of the British Association at its inaugural meeting at York, and that he was chosen to preside over the Provincial Medical and Surgical Association at its meetings in Manchester. Dr. Holme was a native of Kendal; he was educated at Manchester New College, one of the Institutions now connected with the University of London. He studied Medicine in the University of Leyden, where he graduated as M.D.

[*Andrews Fund.*]

[Since the presentation of this Report at the Annual Meeting, the Council have received another very gratifying proof of approbation of the principles on which the College has been founded, and of confidence in those by whom its affairs are conducted. Five Thousand Pounds have been placed in the hands of Lord Auckland by a "Friend to Civil and Religious Liberty," who conceals his name, "to be applied to the purposes of the College in such manner as the Council shall think fit." This gift is made on condition that the sum shall be kept entire, and designated the *Andrews Fund*; and that the Scholarships which may be instituted, or other objects to which the Income arising from the Fund may be appropriated, shall be distinguished by the name of ANDREWS.

The Council have invested the sum in the purchase of 6042*l.* 5*s.* 11*d.* 3 *per Cent. Reduced Annuities*, and entered it in the books of the College as the "ANDREWS FUND." They will carefully consider to what object the annual proceeds shall be applied, so as to promote the intentions of the Donor.]

Flaxman's Sculptures.

Among the gifts of the preceding year is one of a peculiar character. Miss Maria Denman, the surviving Executrix, sister-in-law and adopted daughter of the great sculptor John Flaxman, has presented the College with a valuable collection of his works, consisting of the first casts in plaster from the clay originals, in some instances worked over by the artist himself, of groups of figures, statues, *Alti and Bassi Rilievi*, altogether about 140 in number, and including some of his most excellent productions. This collection may probably lay the foundation of a School of Art within the walls of the College. It is proposed that the entrance Hall under the Dome shall receive the larger works. The providing of space for the rest of the Collection will be effected at the cost of the College in making certain enlargements of the building, which are now required for the purposes of instruction. The Council will not have to make provision out of the College resources for the cost of fixing these works of Art: they have received assurance that the charge will be defrayed by individuals who take an especial interest in the promotion of the fine Arts, and duly estimate the genius of Flaxman, and the station he held among the artists of Modern Time.

Blackburn Law Library.

In the month of March last a valuable addition to the Law Library was received from Miss Eleonora Blackburn, who presented to the College the Law Books (about 2400 volumes) of her late brother, William Blackburn, Esq., of Lincoln's Inn.

Bequest of Books of Walter Wilson, Esq.

For the General Library an illustrated copy of the life of De Foe, in seven volumes, with other curious works and MSS., bequeathed to the College by the late Walter Wilson, Esq., author of the life of De Foe, were presented in the month of July by Walter Wilson, Esq., the son of the Testator*.

Mr. Taunton's Donation of Surgical Preparations.

In the month of November Mr. John Colley Taunton, M.R.C.S.E., presented to the College his valuable Surgical Collection, consisting of 400 Preparations in glass, and 50 plaster of Paris Casts, illustrative of Disease of the Human Body.

Ceded Shares.

Since the last announcement shares have been ceded to the Council for the purpose of being conferred on Students of the College who have graduated with Honours at the University of London with the title of "Fellows," according to the clauses 13 and 14 of the Bye-Laws—by Henry Waymouth, Esq., one share; the Executors of Sutton Sharpe, Esq., according to arrangement between Mr. Sharpe and Mr. Warburton, who had presented the share to Mr. Sharpe, one share; W. J. Denison, Esq., ten shares: all immediately; the Bishop of Durham; Martin Thackeray, Esq.; each one share, in reversion.

PROFESSORSHIPS.

In the Faculty of Arts the department of Civil Engineering has been completed by the appointment of Mr. Bennet Woodcroft to the Professorship of Machinery. Mr. Andrew Crombie Ramsay has been appointed Professor of Geology. During the absence of Professor Fownes, who, at the commencement of the winter, went to Demerara on account of ill health, his duties in the Laboratory of Analytical Chemistry have been discharged by Professor Graham: and the studies of the Italian Classes have been directed by Signor Gallenga, as substitute for Professor Pepoli during the absence of the latter in Italy.

The Professorship of Oriental Languages is now vacant. The Teachership of German also has recently become vacant by the decease of Mr. Wittich, who died on Saturday last, after a few weeks' illness. The loss of Mr. Wittich's services will be much felt. His system of teaching the language was peculiar and effective. The books of which he was the author, a Grammar, a volume of Tales, and one of Exercises, were valuable aids both to the Instructor and the Student. He was distinguished besides for his knowledge of Geography; the greater part of the leading articles on that head in the 'Penny Cyclopædia' were contributed by him.

The vacancy in the offices of Professor of Clinical Surgery and of Surgeon to the Hospital, occasioned by the lamented decease of Mr. Liston, has been filled up by the appointment of Mr. James Syme, lately Regius Professor of Clinical Surgery in the University of Edinburgh.

The Council sincerely deplore the early death of Mr. Liston: they feel profoundly the great loss which the public, the profession, and the Surgical School of this College have sustained in being deprived prematurely of the services, as a Practitioner and Teacher, of a man so highly renowned for his scientific treatment of surgical maladies and for his skill in operations.

The measures for completing the Establishment of Medical Officers at the Hospital, mentioned in the last Report as then in contemplation, were soon afterwards carried into effect. Dr. Garrod and Dr. Parkes were appointed Assistant-Physicians, and Mr. John Phillips Potter Assistant-Surgeon to the Hospital. For the office of Assistant-Physician eight applicants presented themselves, seven of whom had been Students of the College, and had there so distinguished themselves that their testimonials might have gained for any of them the appointment

* For other Donations of Books, *vide* p. 14.

they sought. Mr. Potter received his professional education at this College. He had already for several years filled the Office of Assistant Demonstrator of Anatomy, and had acquired considerable experience and reputation as a practical Surgeon, and the superiority of his qualifications was unquestionable. He had scarcely entered on the duties of his office when his untimely death, caused by wounding himself in a *post mortem* examination, deprived the College of his services. The excellent character and professional attainments of Mr. Potter, his zeal in the pursuit of science, and the affecting circumstances under which he became its victim, rendered this melancholy event a subject of public interest. The Council grieved for the loss of one who in the course of his pupillage had frequently received from them the highest collegiate honours, and had recently been advanced by them to an honourable and responsible situation, which they expected would be the commencement of a brilliant professional career. In testimony of the esteem in which he was held, a bust in marble, executed by Mr. Campbell, has been presented to the College by the Professors, Students, and other friends of Mr. Potter, and placed by the Council in the Anatomical Museum.

FINANCES.

The actual Expenditure for the Session 1846-47 was 16,481*l.* 1*s.* 2*d.* The Receipts from Ordinary sources were 15,672*l.* 16*s.* 3*d.* The deficiency of 808*l.* 4*s.* 11*d.* was made up by the contribution of 486*l.* 11*s.* 9*d.* towards the Laboratory of Analytical Chemistry by the subscribers to the Birkbeck Testimonial and the sale of 500*l.* *Consols.* The excess of expenditure over the receipts is accounted for by—the augmentations for Professors, 300*l.*; outlay for apparatus for the Birkbeck Laboratory, 139*l.*; for cases for the Blackburn Library, 50*l.*; for the New Wall and Gates in front of the College Ground, 150*l.*: the Investment of accumulated Dividends in the purchase of 150*l.* 3¼ *per Cents.* in addition to the Ricardo Fund, 132*l.* 11*s.* 3*d.*

DEATH OF MEMBERS OF COUNCIL.

Besides the losses already mentioned, the Council record with pain that they have been deprived by death of the valuable cooperation of two Members of their own body, Mr. Duckworth, Master in Chancery, and Mr. Waymouth. Mr. Waymouth had been a Member of the Council from the first institution of the College.

THE HOSPITAL.

The building of the Hospital is now complete. The improved accommodation for out-patients, mentioned in the last Report as desirable, was obtained in the course of the spring by the erection of a new dispensary and waiting-rooms. The Hospital will now contain 200 beds: but the space for fifty at least must remain unoccupied until a considerable increase has taken place in the Income. The Charity has been for some time dependent on a loan from the Treasurer for the maintenance of the present number of patients. This temporary pressure has been occasioned by the expenditure in finishing the Hospital. A Public Dinner in aid of the Funds has been fixed for the 4th of May. The Earl Fortescue has kindly consented to preside; and the Council feel assured that the exertions of the friends of the Charity will not fail on that occasion, and that the result of the festival will be at least to supply the present deficiency. A contribution of 500*l.* towards that object has lately been received from Charles Dixon, Esq., of Stansted Park, Emsworth, a previous benefactor, and one of the Vice-Presidents.
